THE CLEAN SWEEP

Cleaning the house has taken on a whole new dimension since lockdown. But all that rigorous sanitising, spraying and wiping can be pretty harsh on the hands and environment. It's a good time, then, to look to a healthy and environmentally kind routine, with a focus on New Zealand-made. Earthwise has a new range of effective products that won't cost the earth and they've used 100 per cent biodegradable eco-friendly packing. Available from supermarkets.

THE EVENT

Grab your camera or phone — it's Auckland Photo Day today — and your chance to be part of this year's 24-hour day-in-the life competition. Since the launch of the Auckland Festival of Photography in 2004, the public has been invited to take photos of the Auckland region. Images from the festival's archive will also be showcased at City Rail Link station sites. **For more info see photographyfestival.org.nz**
