

## THE ART OF JUNE

WORDS — JAMES BULLIN

The Art of June greets its annual photography with the Auckland Festival of Photography running from 31 May to 15 June. Many galleries will be showcasing photography.

Photography is an exciting medium, relatively new in terms of art history, it has progressed rapidly, especially with the advent of computer graphics, resulting in artworks that combine digital graphics and organic additions, challenge a viewer's perception of the photographed image as 'real' and blurring boundaries between photography, illustration, painting and performance.
